## CAREER OBJECTIVE

I am seeking an entry-level engineering role at a fast-growing company where I can have an immediate impact and push my learning limits.

## WORK EXPERIENCE

### **Freo Labs Pte Ltd , Bangalore, India — Intern**

Feb 2016 - March 2016

Worked on data analysis and video processing, designed an algorithm for data analysis for analysing and visualizing geojson data from supercars. Used Python, Matplotlib, Numpy and MoviePy for video processing.

### **Google Developers Group : Kashmir — Regional Lead**

November 2011 - Present <http://www.gdgkashmir.com/>

Nurtured a developer community from scratch. Planned & executed projects on behalf of Google by building comprehensive work plans & project schedules, managing budgets for larger events like GDG Devfests and Women Techmakers. Executed beta and pilot programs in collaboration with various Google offices.

### **WebWeave, Srinagar, India — Lead UI & Web Developer**

Jan 2008 - Present

Freelance Web Development. Developed Kashmir's first online classifieds website. Started "KashTech", a tech news blog to bridge the digital divide in the region in 2008.

### **iKraft Software, Srinagar, India — Intern**

Jan 2015 - March 2015

Worked on Python, Web and Data Analysis, analysed & visualized san francisco crime data.

### **Mercy Corps, Srinagar — Intern**

October 2011 - November 2011

Handled web and graphic design for the G-Kashmir event by Google in 2011 and managed the event as a co-organiser which led to direct interaction with the google team and the foundation of GDG Kashmir.
