STRENGTHS

Good communication skills.

Organizational and managerial skills.

Avid learner.

Attention to detail.

Adaptability & Research.

DIY & Quality Control

COVER NOTE:

As an Free and Open Source Software evangelist, I have been fascinated and impressed by the open source ideology and have contributed back to the community in whatever way i could with the resources i have at my disposal.

During my school and college years, I have helped a lot of businesses in Kashmir Valley to showcase their online presence. Using Python and HTML, CSS including CMS like WordPress, I have pioneered many projects, troubleshooted remote systems, and built solutions on data visualization and e-commerce website setups for clients both locally as well as internationally.

i helped manage and organize G-Kashmir event by Google in 2011, where i had the chance to interact directly with the Google Team which lead to the foundation of GDG Kashmir and since then it has been a never ending journey of events where i have worked with students as well as professional developers to share, rant and brainstorm information and ideas amongst individuals.

I have facilitated many events on open source tech including but not limited to a research on women empowerment in Kashmir Valley and how women can leverage on tech to improve their lifestyle and make a living out of it in a dynamic way.

Here is one of the events that was highlighted in the local and national media here, It was themed on Women Techmakers.

http://kashmirmonitor.in/news-kashmir-too-celebrates-womens-day-with-google-63195.aspx

My most recent work involves a 4 week CS with Android workshop at NIT Srinagar where i managed a group of students and helped them build and enhance their fundamentals in Computer Science.
